### **Detailed Action**

1. This is in response to action filed 03/07/09.
2. Claims 8 – 14 were previously allowed, and claims 22 – 35 have been added.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 29 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims draw limitations to a system of software, however the components of the system appear to disclose only software per se type data. Claims disclosing software per se type limitations are not considered statutory subject matter.

### ***Allowable Subject Matter***

5. The prior art of record does not teach or fairly suggest at least the limitations of:

"...determining that the stored user application program installation configuration corresponds to the particular user authenticating the particular user in response to the particular user requesting the application program for installation on a second data processing system; decrypting the manifest file in response to the user authentication; and building the application program on the second data processing system in a configuration customized to conform to the user application program installation configuration decrypted from the manifest file.."
